

ManuFlo also supplies equipment for grout mix, shotcrete, admixtures and tradewaste.

ManuFlo manufactures, repairs, services and calibrates flowmetering equipment and systems.

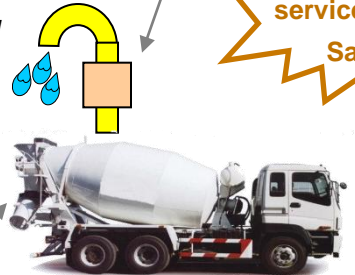

MRPU5-GAL25M standalone slump stand flowmeter or MRPU5-P-GAL25M (part of Dual Display Slump Stand System)

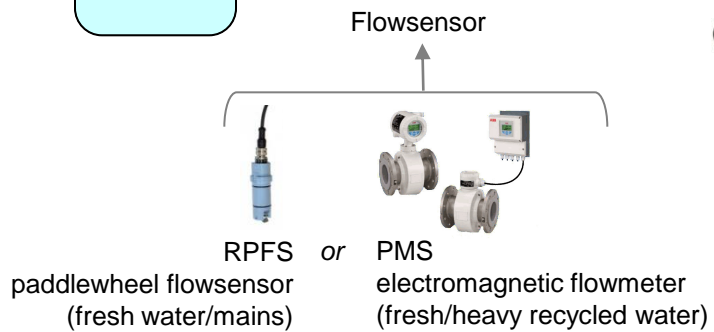

Water Supply
mains or recycled

Typical Batching Installation

Slumpstand

Reconditioning service available. Save \$\$\$

Also available from our distributors.

ME995-7

- Batch Controller.
- select batch quantity via rotary dials to 9999 Litres.
- batching safety features.
- K-factor calibration (to set pulses/Litre).
- interface options available.

MRP20-T2

- 20mm flowmeter for concrete agitator trucks.
- 5-digit LCD shows total Litres.
- closing lid resets Litres count.
- paddlewheel type.
- flowrange: 15–150 Litres/min.

RPFS-P

- flow sensor.
- paddlewheel type.
- for fresh/mains water.
- fits into pipe adapters of various types and sizes 20-200mm.

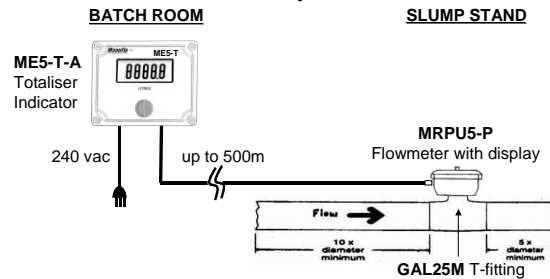

ME3000

- Batch Controller.
- displays in ml or Litres.
- IP64 touch panel.
- fully programmable.
- batching safety features.
- interface options available, including printer for batch tickets and batch record.

DSSS-1

- Dual display Slump Stand / BatchRoom water measurement system.

PMS

- Electromagnetic flowmeters.
- in sizes 3-250mm.
- no moving parts.
- virtually maintenance free.
- for heavy recycled water.
- optional connection kits available in PVC or Gal.

Ideal for QA printout in manual batch plants.

ME6008M

- Batch Monitor/Printer.
- Monitors and prints up to 8 channels of water and admixture.
- IP65 touch panel.
- fully programmable.
- optional printer.

MRPU5-GAL25M

- 25mm slump stand meter.
- 5-digit LCD shows total Litres.
- closing lid resets Litres count.
- flowrange: 18-235 Litres/min.
- available in larger sizes for manual batching of plant water e.g. 50mm MRP5-GAL50M.

Solenoid Valves

- fast acting solenoid valves.
- for water.
- in various types and sizes.
- with or without air assist.
