What is Custody Transfer?

Custody transfer in fluid measurement is defined as a metering point where fluid is being measured and charged from one party to another.

ManuFlo offer the metering equipment required for this transaction being Magnetic Flowmeters with optional integral or remote resettable counters for truck mounted manual batching and or automatic batching systems with ticket print options at completion of transfer. The equipment is supplied fully integrated pre-wired, pre-programmed and pre-tested offering a true reliable 'plug and go' system.

Un-blockable unobstructed flowtube

Other applications include:

- **Flowmeters for chemicals**
 - Dosing applications
 - Data-Logger options

NMI or NATA certification available
