

# MRPU5-GAL25M: Reset counter flowmeter for slumpstands

## Tested, trialed, proven!

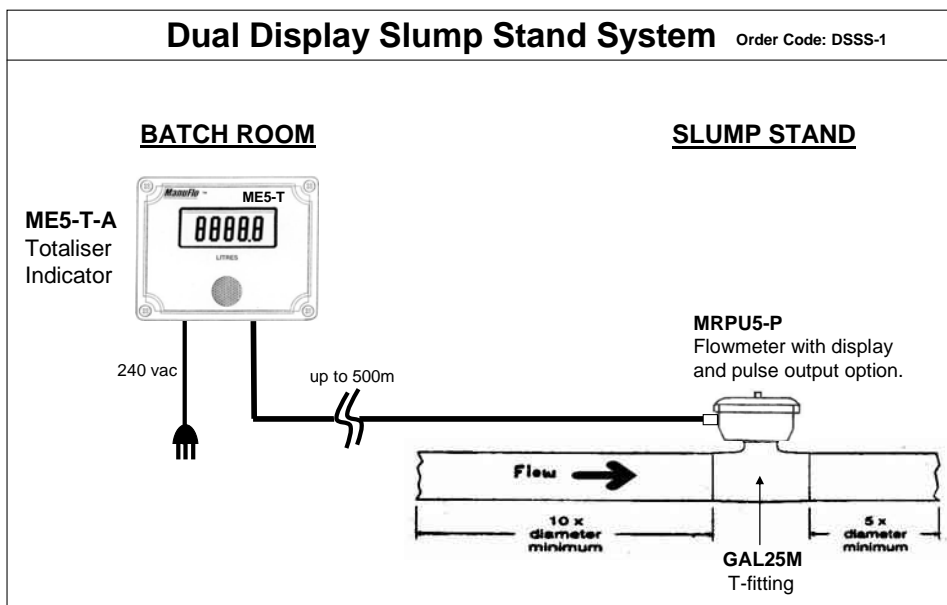

The MRP5-GAL25M 25mm paddlewheel resettable flowmeter:

- resists severe water hammer conditions;
- can measure mild-recycled water, bore water or dirty water without blockage to the paddlewheel;
- can be run at high flow speeds without damage (normal flowrange 18 - 235 Litres/min).

- Closing flowmeter lid resets 5-digit LCD Litres count.
- Paddlewheel made of durable marine grade alloy.
- Calibration Certificate supplied.
- Pulse output option available.
- Virtually no maintenance.
- 1 year warranty.

**Update your slumpstand with an MRP5-GAL25M reset flowmeter.**

**A Dual Display Slumpstand System is also available --** a water measurement system package with a resettable display at the Slumpstand and another resettable display in the Batch Room, so that the Batcher knows how much water is added so that he can enter the quantity on his batch docket.
