

Heavy Recycled Water -Measurement Solution

Is your RPFS Paddle Wheel Requiring constant maintenance on your recycled water?

Forget about expensive weigh batching - **UPGRADE TO A MAGNETIC FLOWMETER!**

MAGFLOW ADVANTAGES OVER PADDLE WHEEL & WEIGH BATCHING

- Absolutely no moving parts to foul, break or wear out !
- Sizes 1"to 6" (25 to 150mm) , light weight wafer design.
- Quick install flange kits, PVC slip (glue in) or GAL (BSP threaded) connections
- Each Magflow includes local display of Total & Rate for confirmation of batched amount.
- Higher accuracy than paddle flowmeters **>+/- 0.5%** of reading with factory calibration cert. supplied.
- Easy swap out, and you can use the same pulse cable from junction box to controller.
- Wired, programmed & tested at ManuFlo prior to shipping so simply install and use.
- **1/10th the price of Weigh Scales and no ongoing calibration requirements saving thousands \$\$\$!!**
- No expensive upgrade of PLC system (weigh scales require analogue inputs).

****All sizes carried in stock CALL MANUFLO to discuss****
