

➤ VERIFICATION AND CALIBRATION OF TRADEWASTE MEASUREMENT SYSTEMS

ManuFlo provides the following services for Tradewaste Electromagnetic Flowmeters and Paddlewheel Systems either electronically or volumetrically: -

On-site installation commissioning verification and calibration test;
Annual verification and compliance calibration;
General Maintaining and Repairs of the flowmeters.

ManuFlo are a supplier of Liquid Tradewaste Magnetic Flowmeters, setup pre-programmed, pre-wired and pre-verified on our wet-test flow-rig for Sydney Water Tradewaste requirements. Supplying & Verifying since 1984.

Sydney Water requires Tradewaste flowmeters to be verified and calibrated annually by an authorized provider.

Visit our website for further details and useful information:-

www.manuelectronics.com.au/tradewaste.html

➤ THE VERIFICATION PROCESS

Once you're on the ManuFlo Verification Database, leave the rest to us. We take the worry out of annual verification and compliance calibration process as specified by Sydney Water.

We call or email you, when your annual verification is due.

We arrange a time for the onsite inspection/verification/calibration/test of your system.

We also check and maintain the flowmeter as required.

You supply a purchase order or payment for the verification.

A Sydney Water compliant calibration certificate is issued by Manu Electronics / ManuFlo and emailed to you.

We can also liaise with your local inspector.

A copy of the certificate is stored on our database.

Simple, Easy and Effective

Greater Sydney Area

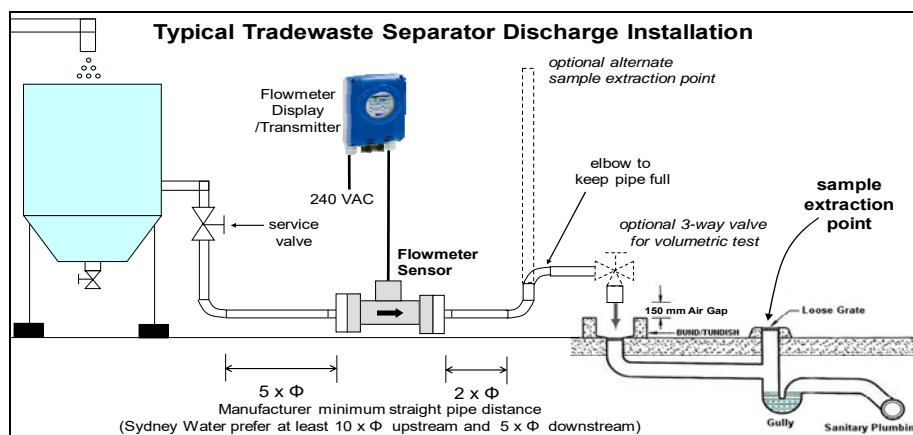

1st Site Visit and commissioning. \$450.00 + GST.

Follow-up future yearly visits. \$425.00 + GST

(For onsite inductions +\$50>)
